Allowable Subject Matter

1. Claims 1-13 are allowed.
2. The following is an examiner's statement of reasons for allowance: The instant claims 1-13 are allowable over the prior art of record, as the prior art of record fails to fairly teach or suggest to one of ordinary skill in the art to prepare a compound meeting the structural limitations of the instant formula (I). In the previous response, the examiner cited two Sato reference teaching similar compounds (the only relevant references found in a structure search performed by a PTO staff member, and the two most relevant found by the examiner in a search of the relevant prior art). Applicant argued that the compounds of the Sato references did not actually meet the instant claim limitations. The examiner has reconsidered the rejection and found that applicant is correct. The relevant compounds of the reference solely teach that the nitrogen-containing heterocyclic rings are fused to two aryl rings, whereas the instant substituents R12-R15 may be aryl groups, but are not able to have two of these substituents taken together to form an aryl ring fused to the heterocyclic ring. An updated search of the prior art of record failed to produce any additional relevant references, therefore the rejections made in the previous office action have been dropped, and the instant claims 1-13 are now allowable over the prior art of record.

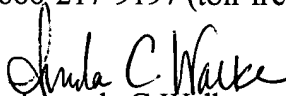

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
